

Computer Aided Consensus Building

Status:

In Progress

IWR Contact:

Hal Cardwell (Hal.E.Cardwell@usace.army.mil)

Purpose:

Building upon the fifteen year history of Shared Vision Planning at IWR, the Computer-Aided Consensus Building Program seeks to identify, improve and apply computer-assisted consensus-building concepts and tools such as SVP towards verifying their niche in resolving water resource issues.

Objective:**Benefits:**

The Computer Aided Consensus Building Program is a vital piece of IWR's three focus areas: 1) Problem solving and decision-making; 2) Future thinking; and 3) Partnering, collaboration and communications
